Objective

Enthusiastic and motivated Junior Frontend Developer with a passion for creating engaging and user-friendly web experiences. Seeking an opportunity to learn, grow, and collaborate on projects that combine creativity and technology to deliver impactful user interfaces and responsive designs and join professional teams.

Experience

Frontend Freelancer | January 2023 – Present

As a freelance frontend developer, I have been actively involved in creating visually appealing and responsive web projects.

Notable Freelancing Projects:

1. **Waiter**

   I developed a responsive website for a shopping app builder dashboard, comprising three distinct pages, utilizing React.js alongside MaterialUI and styled components.
   Live: waiter

2. **Jadwala**

   Scheduling website, developed with HTML, CSS, JavaScript, and Tailwind CSS for a company specializing in appointment organization, comprises five diverse pages for an accessible and responsive experience.
   Live: جدولة

Frontend intern at CodeClause| September 2023 – October 2023

As a Frontend Intern at CodeClause Company, I had the opportunity to work on various web development projects and enhance my skills in the following areas:

- **Project Work**: I was assigned 4 projects. I successfully completed the 4 projects of the internship.
- **GitHub Repository**: I created and maintained a GitHub repository for each project.

Projects I worked on: To-do list, Timer and Stopwatch, YouTube Clone, System survey

Skills

- HTML
- CSS
- Bootstrap
- JavaScript
- Git/GitHub
- React
- Redux
- TailwindCSS

Projects

Waiter Dashboard

It is an innovative platform empowering users to design the interface of their shopping app. With controls and options, users can craft dynamic layouts for their brand. The dashboard ensures seamless synchronization between user edits and real-time previews.

Features:

- **Drag-and-Drop Interface:** Users can seamlessly rearrange the navigation links using the drag-and-drop functionality.
- **Real-Time Preview:** Users can instantly preview the changes they make to their app's interface, facilitating rapid iteration and allowing for adjustments to design elements.
- **Customizable Items:** Users can add and customize various items, including banners, static images, starting screens. They can upload images from their devices, integrating personalized visual content into their app interface.
- **Payment Integration:** The dashboard facilitates payment integration, allowing users to conveniently add their bank account information for transactions related to app development and maintenance.

Technologies: React.js, Redux, Material UI, Styled Components, React Beautiful DND, React Router Dom.
